Herts Mechanical Handling Services

Supply, installation and maintenance of materials handling equipment.

Herts Mechanical Handling Services

At HMHS we are leaders in the installation, maintenance and relocation of integrated materials handling systems.

Our professionally qualified engineers, 24-hour support team and highly skilled project planning and management professionals ensure we will deliver a solution tailored to the needs of your organisation.

We understand how a company's business critical processes rely upon the ongoing efficiency of their production or distribution facilities. We work closely with our clients to guarantee they achieve their business objectives as well as reducing their costs and production downtime.

At HMHS we pride ourselves on our long-term, client relationships; each year the number of clients who have service contracts with us continues to grow. This expertise, commitment and high service level ensures a quality tailor made handling solution from the installation of a warehouse to the site relocation of a factory or a maintenance contract.

The highly trained engineers at HMHS have worked within the materials handling industry for many years allowing us to offer a wide range of cost-effective, highly skilled services.

“Levi Strauss, were happy to appoint HMHS as their maintenance contractors, not only for the materials handling equipment but for the whole site. The partnership between Levi's and HMHS has been a key element in the overall performance of this prestigious facility.”

Levi Strauss & Co

We are committed to the ongoing training of our professionally qualified engineers and project managers. This allows us to ensure our clients are kept at the forefront of the latest technology, can benefit from our years of expertise and are safe in the knowledge they are operating within the latest health and safety regulations. All HMHS, engineers follow the CDM (Construction and Design Management) regulations and operate within a quality management system that has been design to meet the requirements of ISO9001.

At HMHS we have over 18 years of experience and a thorough understanding of current legislation. This allows us to offer our clients independent, competitive solutions to their material handling needs. Our project management and support team are on hand to give you unbiased advice, whatever your requirement, from how to meet the latest LOLER regulations to big machine moves, to the servicing of a carousel.

Our professional project management service, 24-hour support and ISO9001 accreditation ensures a successful, seamless project every time.
